

KAIZEN

POKER

Key Points

- Quick to learn; gameplay is fluid
- Setup is instantaneous
- Combines familiar poker scoring with the pleasing rhythm of deckshaping
- Tactical scoring considerations weigh against strategic deck-sculpting options
- Make the best of the constrained options you have; many opportunities to feel clever
- Decks improve over time, peaking in the final rounds
- Slick catch up mechanism produces dramatic finishes
- Beautiful illustrations; enticing, hefty poker chips
- Every game is different
- More than one way to win: different strategies emerge from the decks you are dealt

In ***Kaizen Poker***, you make the best of the hand you are dealt, but you don't have to settle: take actions that give you more options, modify cards to form stronger hands, amend the rules to your favor, or cut cards from your deck if they're not part of your plans.

Each card in this 52-card deck carries both its poker rank/suit and a unique action. Each round, you'll draw seven cards, play two as actions, then reveal the best five-card hand you can build from the rest.

Sculpt your perfect deck.
